

How to find the hotspot password on the Sprint hotspots:

Sprint ZTE Coolpad Hotspot

Your password is in 2 places. The first is on the white sticker on the box. The password is the last 8 numbers of the IMEI.

The second place where your hotspot is located is inside the cover of the device.

Along one edge, there is a small notch. This is where the student can open the hotspot cover!

On the inside cover opposite the battery is a small white sticker. This sticker is where the password for the hotspot is located! Do not lose this sticker!

We recommend you take a picture of the password, or write it down somewhere. But please leave it inside the hotspot.
